Leon Valley November 2023 Sales Tax Report

Background

The sales tax information is provided monthly by the Texas Comptroller. The sales tax information is reported 2 months in arrears; therefore, this report reflects September actual sales tax figures.

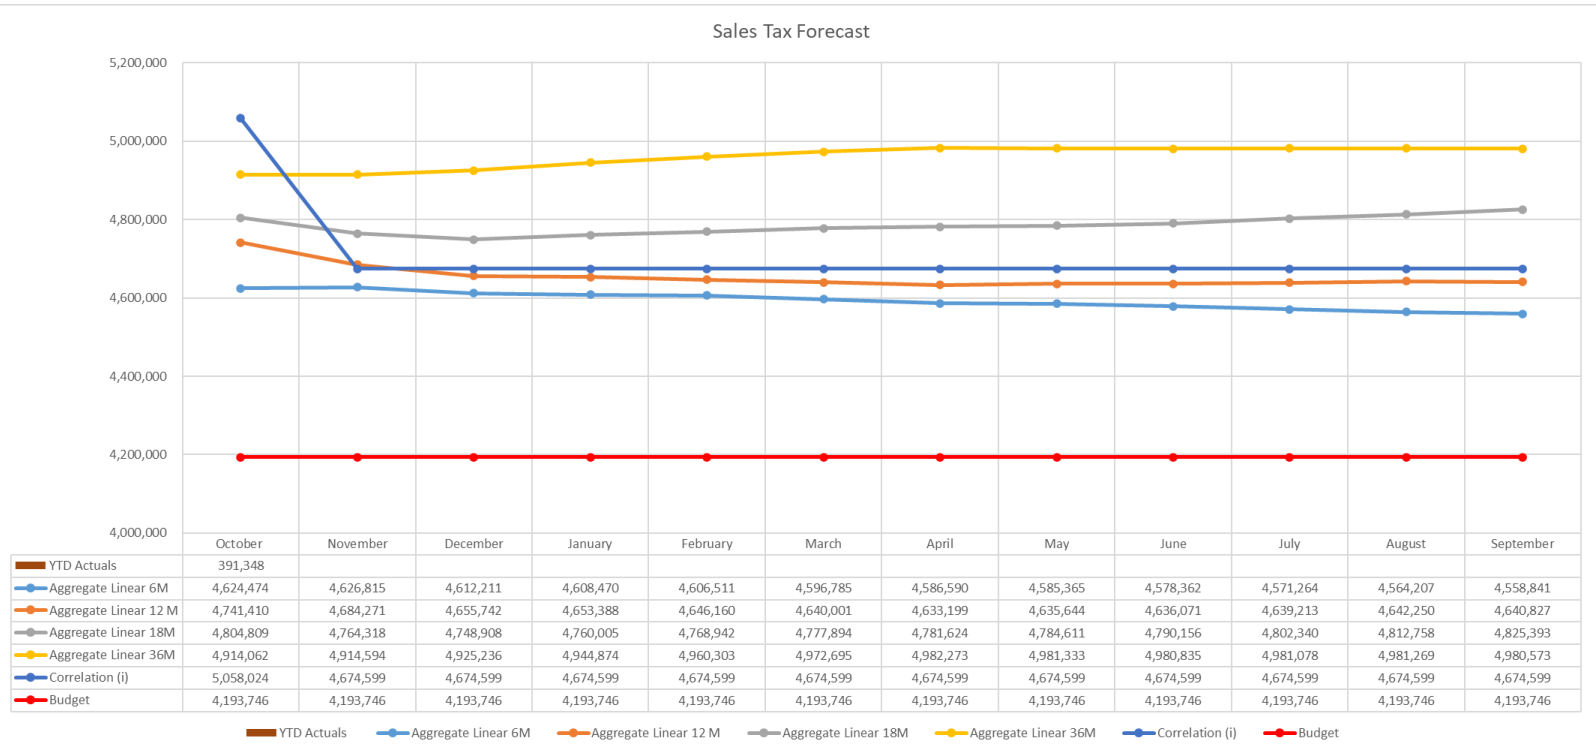

The city collected \$421,314.39 for November 2023. This amount is \$34,690 or 7.00% lower compared to the same month last year. The collection for this month is higher than the 3-year average of \$400,648. This is the second collection for the fiscal year. The FY 24 budget is \$4,193,746.

	FY 24 Actuals	FY 23 Actuals	FY 22 Actuals	FY 21 Actuals	3 YEAR AVERAGE
Oct	391,348	373,753	324,722	270,370	322,948

Grand Total	812,662	4,628,697	4,370,851	\$ 3,823,032	\$4,274,193

FY 24 Forecast

The City of Leon Valley has budgeted \$4,193,746 for FY 2024. This amount is lower than the total collected in FY 23. This has to do with the high inflation we saw at the start of FY 23 as consumers were paying higher prices for products, and the city benefited at the start of the fiscal year. However, that benefit has more than likely ended. In the previous year we saw increases of 20% in some months. While the City expects economic growth, an increase like we saw at the start of the last fiscal year is somewhat unrealistic. The month of November shows a decrease of 7.00% compared to an increase of 17.9% in 2023. The forecast table shows a significant drop with the lower collection for November. However, there is still a large range for FY 24 from \$4.6 million to just over \$4.9 million. As we progress through out the year the forecast range will tighten and be more accurate.

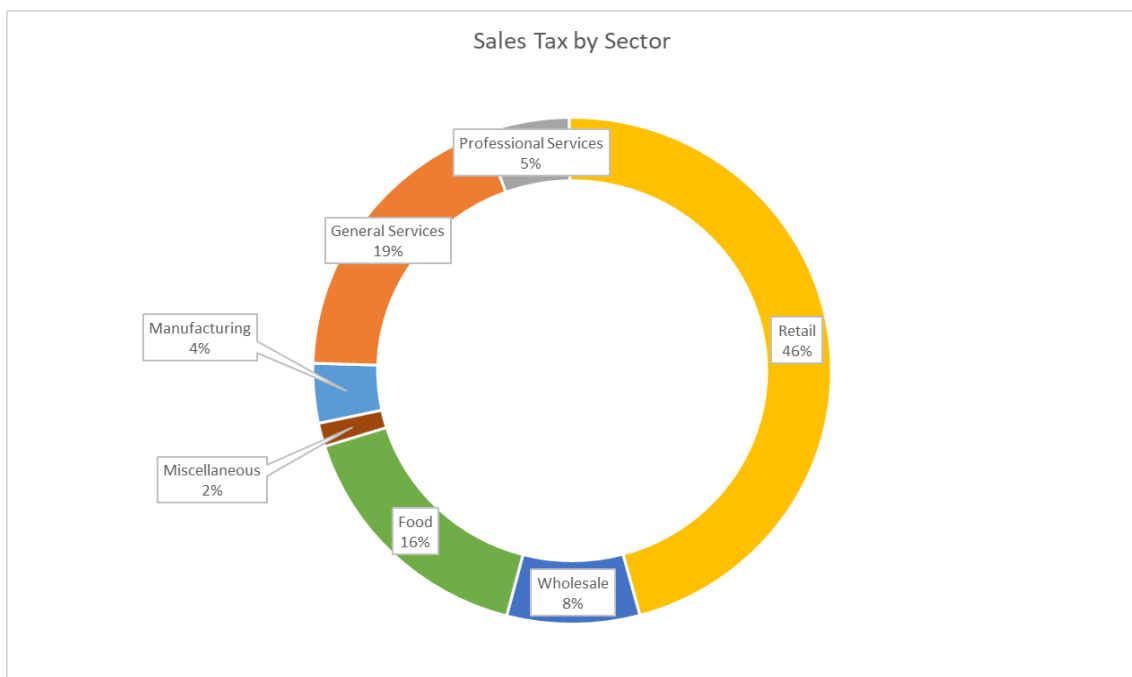

Sales Tax History

The City’s core sectors are retail, general services, and food represent about 80% of collections in any given month. The graph shows the average distribution for the City of Leon Valley. Monthly, staff reviews the confidential report from the state to ensure there are no major variances in the City’s core sales tax sectors and taxpayers.

Sales Tax by Sector

Major Economic Factors

US INFLATION

The all items index rose 3.2 percent for the 12 months ending October, a smaller increase than the 3.7-percent increase for the 12 months ending September. The all items less food and energy index rose 4.0 percent over the last 12 months, its smallest 12-month change since the period ending in September 2021. The energy index decreased 4.5 percent for the 12 months ending October, and the food index increased 3.3 percent over the last year.¹

Chart 2. 12-month percent change in CPI for All Urban Consumers (CPI-U), not seasonally adjusted, Oct. 2022 - Oct. 2023

The Consumer Price Index for All Urban Consumers (CPI-U) was unchanged in October on a seasonally adjustment, according to the U.S. Bureau of Labor Statistics. This means that consumers prices were unchanged in October in the overall economy. While the inflation rate trends downward, it is still higher than the desired 2% target of the Federal Reserve. If inflation in the overall economy continues to stay above the targeted 2% and wages do not increase, then spending on discretionary goods or non-essential products will decline. The city does not collect sales tax on most food and energy commodities, which are considered necessities.

US Montney Policy

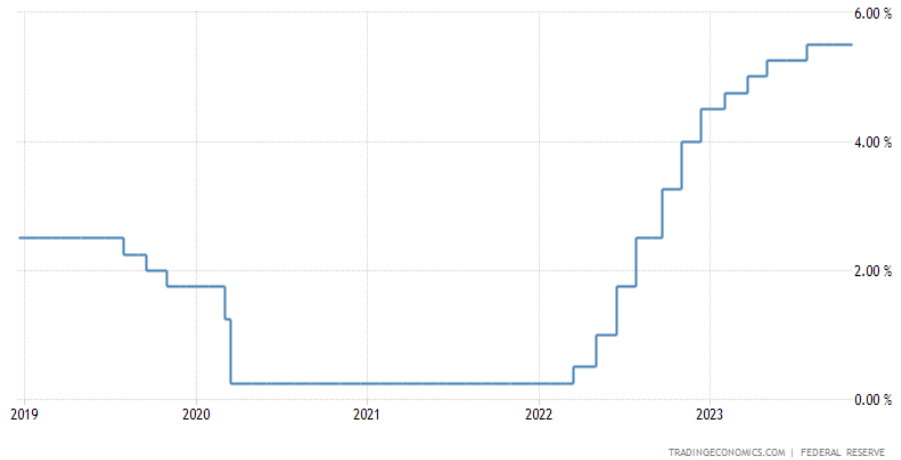

At the start of the pandemic, the Federal Reserve lowered the interest rate banks pay to between 0.0% and 0.25%. This was done to make it easier and cheaper for banks to loan money out to the public and to avoid an economic recession or depression. However, as the country returned to pre pandemic activities the Federal Reserve increased interest rates, throughout 2022 and 2023, to combat the record high inflation.

¹ <https://www.bls.gov/news.release/pdf/cpi.pdf>

²Federal Reserve rate increases will decrease the amount of money available to spend on discretionary items as consumers will pay more in interest payments. The average mortgage rate has increased significantly due to rate increases. The average mortgage rate in October 2020 was just under 3% , compared to 7.12% in September of 2023.

Someone who purchased a home at \$250,000 home at 3% for a 30-year fixed rate will pay an estimated \$1,054 per month for that home in principal and interest payments. That payment would increase to \$1,663 per month for that same home at 7%.

An increase in rates has a direct impact on economic output, as increasing rates are meant to limit the amount of available money in the economy. Further, increases in rates cause businesses to reconsider capital investments and growth as borrowing costs rise.

Leon Valley, the San Antonio Metro Area, and the State of Texas

Leon Valley ranked 9th in the San Antonio Metro and 231st in the State of Texas for collections for the month of November.

All but three cities in the San Antonio Metro area saw a decrease from last year. This could be to the economic factors noted above. The overall metro area also saw a small increase of almost \$1.9M or 3.77% from \$49,976,239 to \$48,093,617.

The State of Texas saw a small increase of 1.71% from \$738,739,367.94 to \$751,358,378.85.⁴

Staff will continue to monitor the sales tax collections.

Rank	City	Net Payment This Period	Comparable Payment Prior Year	\$ Change	% of Change
2	San Antonio	\$40,593,434	\$41,924,468	(\$1,331,034)	-3.17%
